

## **M-Systems Product End Of Life (EOL) Notification**

**Dear Customer,**

M-Systems is announcing today the immediate End Of Life (EOL) of the 40MB DiskOnChip 2000 high profile product (MD2201-D40). The End Of Life refers to both the 3.3V (MD2201-D40-V3) and 5V (MD2201-D40) parts. All other DiskOnChip 2000 capacities will remain unchanged.

**Reasons For The EOL:**

- Due to 64Mbit NAND flash allocation and its cost structure, the MD2201-D40 is no longer cost effective.
- The alternative low profile DiskOnChip devices with similar capacities are more compact and cost effective in production.
- The low profile DiskOnChip alternative devices are available in commercial and extended temperature ranges, while the MD2201-D40 was offered only in the commercial temperature range.

**Call For Action:**

M-Systems requests customers using the MD2201-D40 to evaluate disk size needs and shift to the 32MB or the 48MB DiskOnChip alternative listed below.

**M-Systems' Alternative Product Solutions:**

Use the following alternative products in place of the MD2201-D40:

- MD2202-D32: Low profile DiskOnChip 32MB
- MD2202-D48: Low profile DiskOnChip 48MB

Please contact your M-Systems' representative, or refer to M-Systems' web site ([www.m-sys.com](http://www.m-sys.com)), for any further information or guidance.
